

Safal Gotame

Software Engineer | Full Stack Developer

Kathmandu, Nepal | +977 9840843064 | lamichhanem36@gmail.com

Portfolio: <https://sdev-portfolio.vercel.app>

LinkedIn: <https://linkedin.com/in/safalgotame>

Professional Summary

Software Engineer with 2+ years of professional experience building scalable web applications using React, Next.js, TypeScript, Node.js, Express.js, and MongoDB. Experienced in developing responsive user interfaces, designing RESTful APIs, integrating real-time communication, and delivering production-ready applications across multiple business domains. Passionate about clean architecture, maintainable code, and solving real-world engineering problems.

Technical Skills

- **Languages:** JavaScript (ES6+), TypeScript, HTML5, CSS3, SQL
- **Frontend:** React, Next.js, Tailwind CSS, Material UI, Redux Toolkit, React Query
- **Backend:** Node.js, Express.js, REST APIs, Socket.IO, JWT Authentication
- **Database:** MongoDB, MySQL
- **IoT:** ESP32, MQTT, Real-time Monitoring & Automation
- **Tools:** Git, GitHub, Docker, GitHub Actions (CI/CD), Linux, Postman, Cloudinary, Vercel

Professional Experience

Full Stack Developer — Web Studio Nepal

January 2024 – Present | Kathmandu, Nepal

- Develop production web applications using React, Next.js, TypeScript, Node.js, Express.js, and MongoDB.
- Collaborate with designers and backend engineers to deliver responsive, production-ready software.
- Design reusable UI components and modular application structures to improve maintainability.
- Integrate REST APIs and third-party services into client applications.
- Optimize application performance, accessibility, responsiveness, and SEO.
- Participate in testing, debugging, deployment, and Git-based collaborative development.
- Contributed to projects across e-commerce, healthcare, restaurant management, education, and enterprise domains.

Security Analyst — Raechal Enterprise

August 2023 – January 2024

- Performed security monitoring and basic vulnerability assessments.
- Worked with developers to encourage secure coding practices.
- Supported incident monitoring and documentation.

Selected Projects

Smart Farm (Private SaaS – In Development)

Tech Stack: React, TypeScript, Node.js, Express.js, MongoDB, ESP32, Socket.IO

- Building a SaaS platform for smart farm management and operational automation.
- Designed scalable architecture supporting multiple farms, users, and IoT devices.
- Developing dashboards for monitoring farm conditions and device management.
- Implemented authentication, real-time updates, and historical sensor data storage.

IoT Monitoring & Automation Platform

Tech Stack: React, TypeScript, Node.js, Express.js, MongoDB, ESP32, MQTT, Socket.IO

- Built a real-time monitoring and automation platform for connected IoT devices.
- Integrated ESP32 devices using MQTT and Socket.IO for live communication.
- Developed REST APIs, device management, automation rules, and alert workflows.
- Created responsive dashboards for telemetry and operational monitoring.

Media Harvest

Tech Stack: Next.js, React, TypeScript, Node.js

- Built a web application to process and download media from supported platforms.
- Implemented queue-based media processing and backend API integration.
- Designed responsive UI with reusable components.

Education

Bachelor of Computer Application (BCA)

Jaya Multiple Campus, Kathmandu

Graduated: 2025

Certification

JavaScript Algorithms and Data Structures — freeCodeCamp
